# Why not in JIRA?

The screenshot displays the Plangle interface with a Kanban board titled "Demo Board 2". The board shows a list of issues with columns for "Project", "Key", "Story", "Sub-task", "Description", "Story est.", "Subtask est.", and "Cost". Callouts highlight specific features:

- Quick Epic/Story creation:** A callout points to the "Story" dropdown menu in the top left, with the text "Quick Epic/Story creation Shortcut: 'INS'".
- Quick Epic/Story edition:** A callout points to the "Star Wars" issue, with the text "Quick Epic/Story edition Shortcut: 'ENTER'".
- Resolve issue:** A callout points to the "Delete" button in the top right, with the text "Resolve issue Use 'DEL' to delete issue".
- Edit row:** A callout points to the "Edit in JIRA" option in a context menu, with the text "Edit row Shortcut: 'CTRL+E'".

# Copy-Paste from Anywhere

The screenshot displays the Plangle software interface for a project named 'Demo Board 2'. The interface includes a top navigation bar with 'Plangle', 'Dashboards', 'Projects', 'Issues', 'Agile', and 'Create' menus. Below this is a search bar and various tool icons. The main workspace shows a Kanban board with columns for 'Epic', 'Story', and 'Sub-task'. Several items are visible, including 'Lord Of The Rings' and 'Star Wars' epics, and their associated stories and sub-tasks. Three callouts are present: 1) A callout pointing to the top navigation bar with the text 'Display Epics in hierarchy'. 2) A callout pointing to a menu icon in the top bar with the text 'Select quick filters'. 3) A callout pointing to a sub-task item with the text 'Display Epics like labels (JIRA Agile style)'. The board also features a 'Target date' field and 'Select quick filters' options.

# Sub-task creation in no time

Quick subtask configuration

Quick subtask for extremely fast sub-task creation

# What will be done until...?

Set your target date and we'll tell you how realistic it is based on your velocity estimations

The screenshot shows the Plangle interface for 'Demo Board 2'. The target date is set to 2015/09/10. A velocity selector shows three options: 5 (Green), 10 (Yellow), and 12 (Orange). A tooltip for the Green velocity states: 'Confident velocity: whatever happens we can definitely progress with this speed'. The main table lists tasks with their estimated completion dates and costs.

Project	Key	Sub-task	Description	Story est.	Subtask est.	Cost
11	ONE	ONE-162	Issues without epic	21.0	33.0	10,500 \$
12	ONE	ONE-160	A long Story in LOTR	7.0	28.0	3,500 \$
15	ONE	ONE-162	Lord Of The			
18	ONE	ONE-167	A short Story in LOTR	5.0		2,500 \$
21	ONE	ONE-164	Find an elf			
23	ONE	ONE-170	Cut them off anyway			
24	ONE	ONE-171	Repeat until you have 10			
26	ONE	ONE-173	I'm the Story of the Episode I	1.0		500 \$

Issues marked Green will be done even if we can only proceed with our Green (Confident) velocity during the project

Issues marked Yellow will be done if we can proceed with our Yellow (Probable) velocity during the project

Issues marked Orange will be done only if we can proceed with our Orange (Unexpected) velocity during the project

Issues marked Red will NOT be completed even if we can proceed with our Orange (Unexpected) velocity during the project

3 velocities to see feature completion probabilities by a target date
